

PRECISION CHEMISTRY
FOR FERTILIZER &
OILFIELD PERFORMANCE

شركة اطلس الافضل
للصناعات الكيماوية

PREMIUM ATLAS CHEMICAL INDUSTRIES CO.

COMPANY

Premium Atlas Chemical Industries Co is a trusted manufacturer of high-performance, tailor made chemical solutions, specializing in **Speciality Chemicals for Phosphate & Urea Fertilizer Plants and Stimulation & Descaling Chemicals for the Oil & Gas Industry**. We are driven by innovation, sustainability, and a deep understanding of industrial challenges, we deliver chemical formulations that enhance process efficiency, product yield, and operational safety.

With a modern manufacturing facility, a strong R&D backbone, and a commitment to delivering value-added solutions, we support key sectors in the Middle East and beyond, ensuring consistent product quality and reliable service.

Technology Partnership

We are proud to collaborate with Fertibon Products, India as our technology partner for Speciality Chemicals used in Phosphate Fertilizer applications.

Fertibon, a company promoted by experienced technocrats in the field of surface chemistry, has developed a broad spectrum of specialty performance chemicals that balance tradition and innovation. Their expertise has been instrumental in helping us deliver advanced chemical formulations that meet the highest industry standards.

CORE SPECIALIZATIONS

Speciality Chemicals for PhosphateFertilizer Plants

We provide a comprehensive range of chemical additives and process enhancers designed to optimize phosphate processing and fertilizer production. Our portfolio includes:

- Anticaking Agent
- Anticaking agent for Water Soluble Fertilizers
- Colouring Agent
- Colouring cum Anticaking agent
- Urea Melt additive
- Granulating aid
- Defoamer
- Crystal Habit Modifier
- Urea Anticaking Agent
- Flocculating Agent

These formulations are engineered to reduce downtime, minimize maintenance, and ensure consistent product quality.

Stimulation & Descaling Chemicals for Oil & Gas Industry

We offer advanced stimulation chemicals that improve reservoir productivity and well performance. Our range includes:

- Iron Sulphide & Carbonate Dissolver
- Mud Barite, Barium, Strontium, Carbonate Compound Dissolver
- Mud Cake Remover, Emulsion Breaker, Carbonate/Sulphide Scavenger
- Oil & Synthetic Based Mud Dissolver
- Degreaser

MANUFACTURING FACILITY

The manufacturing facilities of Premium Atlas Chemicals are located at Dammam, Saudi Arabia. The manufacturing is manned by a set of dedicated technical professional who understand the need of precise monitoring of process parameters for quality assurance.

Premium Atlas Chemical Industries will be able to guide the user industry in selecting a product from its range for the desired application along with guidelines for method of application and testing of the efficacy of the products.

RESEARCH & DEVELOPMENT

Our R&D team, in collaboration with our technology partners and academic institutions, focuses on:

- Custom product development
- Field-specific formulation support
- Continuous innovation for enhanced performance
- Sustainable and compliant chemical solutions

INDUSTRIES WE SERVE

- Phosphate Fertilizer Manufacturing Plants
- Oil & Gas Upstream and Midstream Operations
- Petrochemical Processing
- Water Treatment & Utilities
- Urea Fertilizer Manufacturing Plants

MANUFACTURING FACILITY

For users of PAC Products for Fertilizers, it is necessary to take into account the following factors before deciding the economic level of dosing and the engineering method for dosing.

- Designs,
- Granule/prill strength
- Presence of fines
- Moisture content and
- A host of other factors

We invite all our valued customers to take advantage of our engineering service by spelling out their constraints and objectives for proper recommendations.
